# Full colour office labelling solution

## Helping offices to be organised and efficient

# A useful solution for the whole office

In the fast-paced day-to-day of office life, organisation is key to keeping things running smoothly. That's where labelling comes in, by creating continuous roll labels ideal for identifying the contents of files or folders, indoor signage, shelf edge labels or even visitor badges, your office will be organised in no time.

The VC-500W is powered by ZINK® Zero-Ink® Printing Technology, special colour crystals in the paper are activated by heat to create full colour labels without the need for additional ink cartridges.

## Four ways Brother labelling technology supports your business

### 1. Keep things organised

Brother's labelling solutions help to ensure everything stays in perfect order. With a range of roll widths available and full colour printing there's no limit to the labels you can create. This means you spend less time looking for things and more time working on them.

### 2. Create a professional finish

The Brother full colour label printer helps to give you a professional finish by replacing hand-written labels with full colour, glossy labels. Perfect for creating clarity around the office, the full colour label printer produces labels from 9mm to 50mm in width and with the continuous roll you are not limited in length either.

### 3. Improving efficiency

With a Brother label printer at your side, even the most tedious tasks can be done in no time. PC/Mac connection allow you to effortlessly create customised designs using our free P-touch Editor Software or even connect to Microsoft Office programmes. Wireless connectivity also allows you to print directly from your smartphone or tablet, including adding your own pictures using the Color Label Editor app.

### 4. Aiding collaboration

Collaboration is important in every office, which is why we make it as easy as possible for you to work together with wireless and USB connection. Print directly from your PC / Mac using our free P-touch Editor software.
